Our Story

- Aimed at producing, processing and distributing the best quality of Iranian Pistachios.
- The next-generation gathered an expert team to focus on GMO-free, high in quality, with minimal pesticide usage and absolutely nutritious goods.
- Now an ISO certified organization with the latest focus on a variety of organic and healthy products in our list.
- In our constant quest for excellence, the quality of our goods is always the priority.

Timeline

1977

A THOUGHT

An idea to grow pistachios was a lingering thought for Taher

1981

THE FIRST FARM

We began our first pistachio farm

2000

EXPORT

We ventured into international market by exporting of our goods.

2012

MORE PRODUCTS

We continued to expand our product list as we were receiving more demands and requests.

2017

AWARDED

The best in Management of pistachio processing plant and also as the best pistachio processing plant in the Khorasan Province.

Our Mission

To provide high-quality products while supporting low-income group of Khoshab region to be financially independent & be vigilant in environmental protection & customer satisfaction

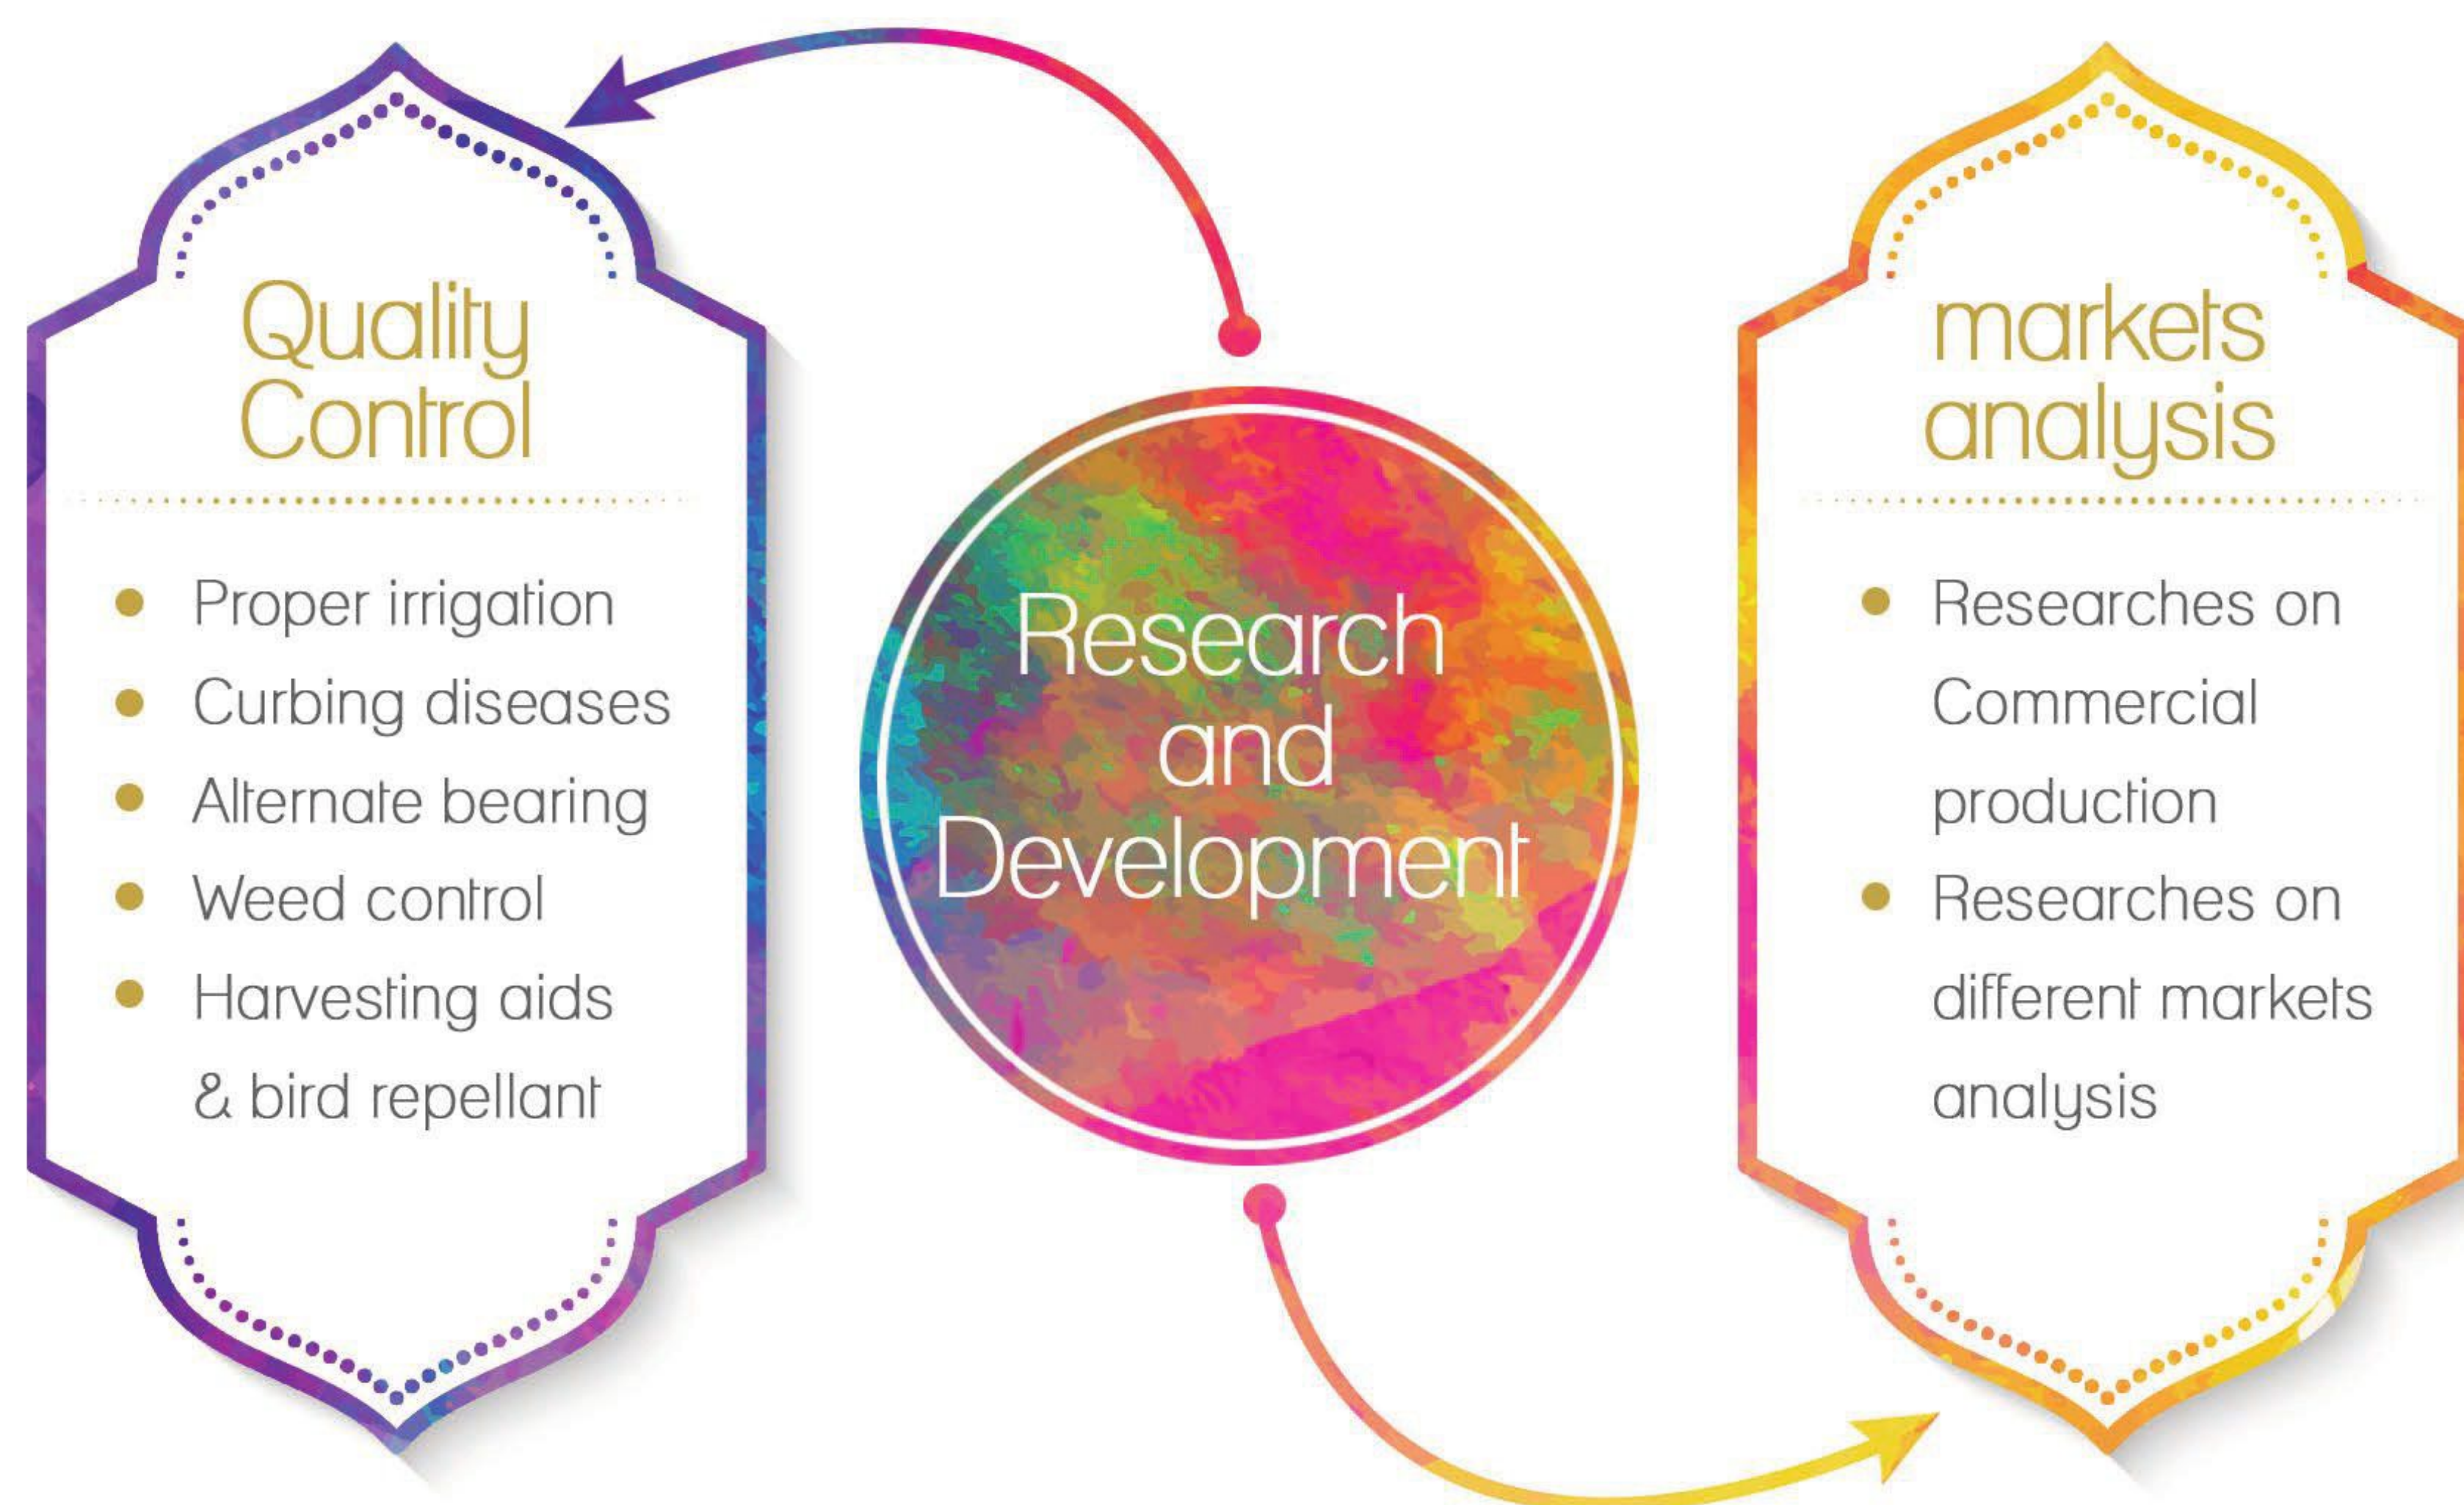

Our Vision

To be the most influential distributor in South East Asia

Quality Management

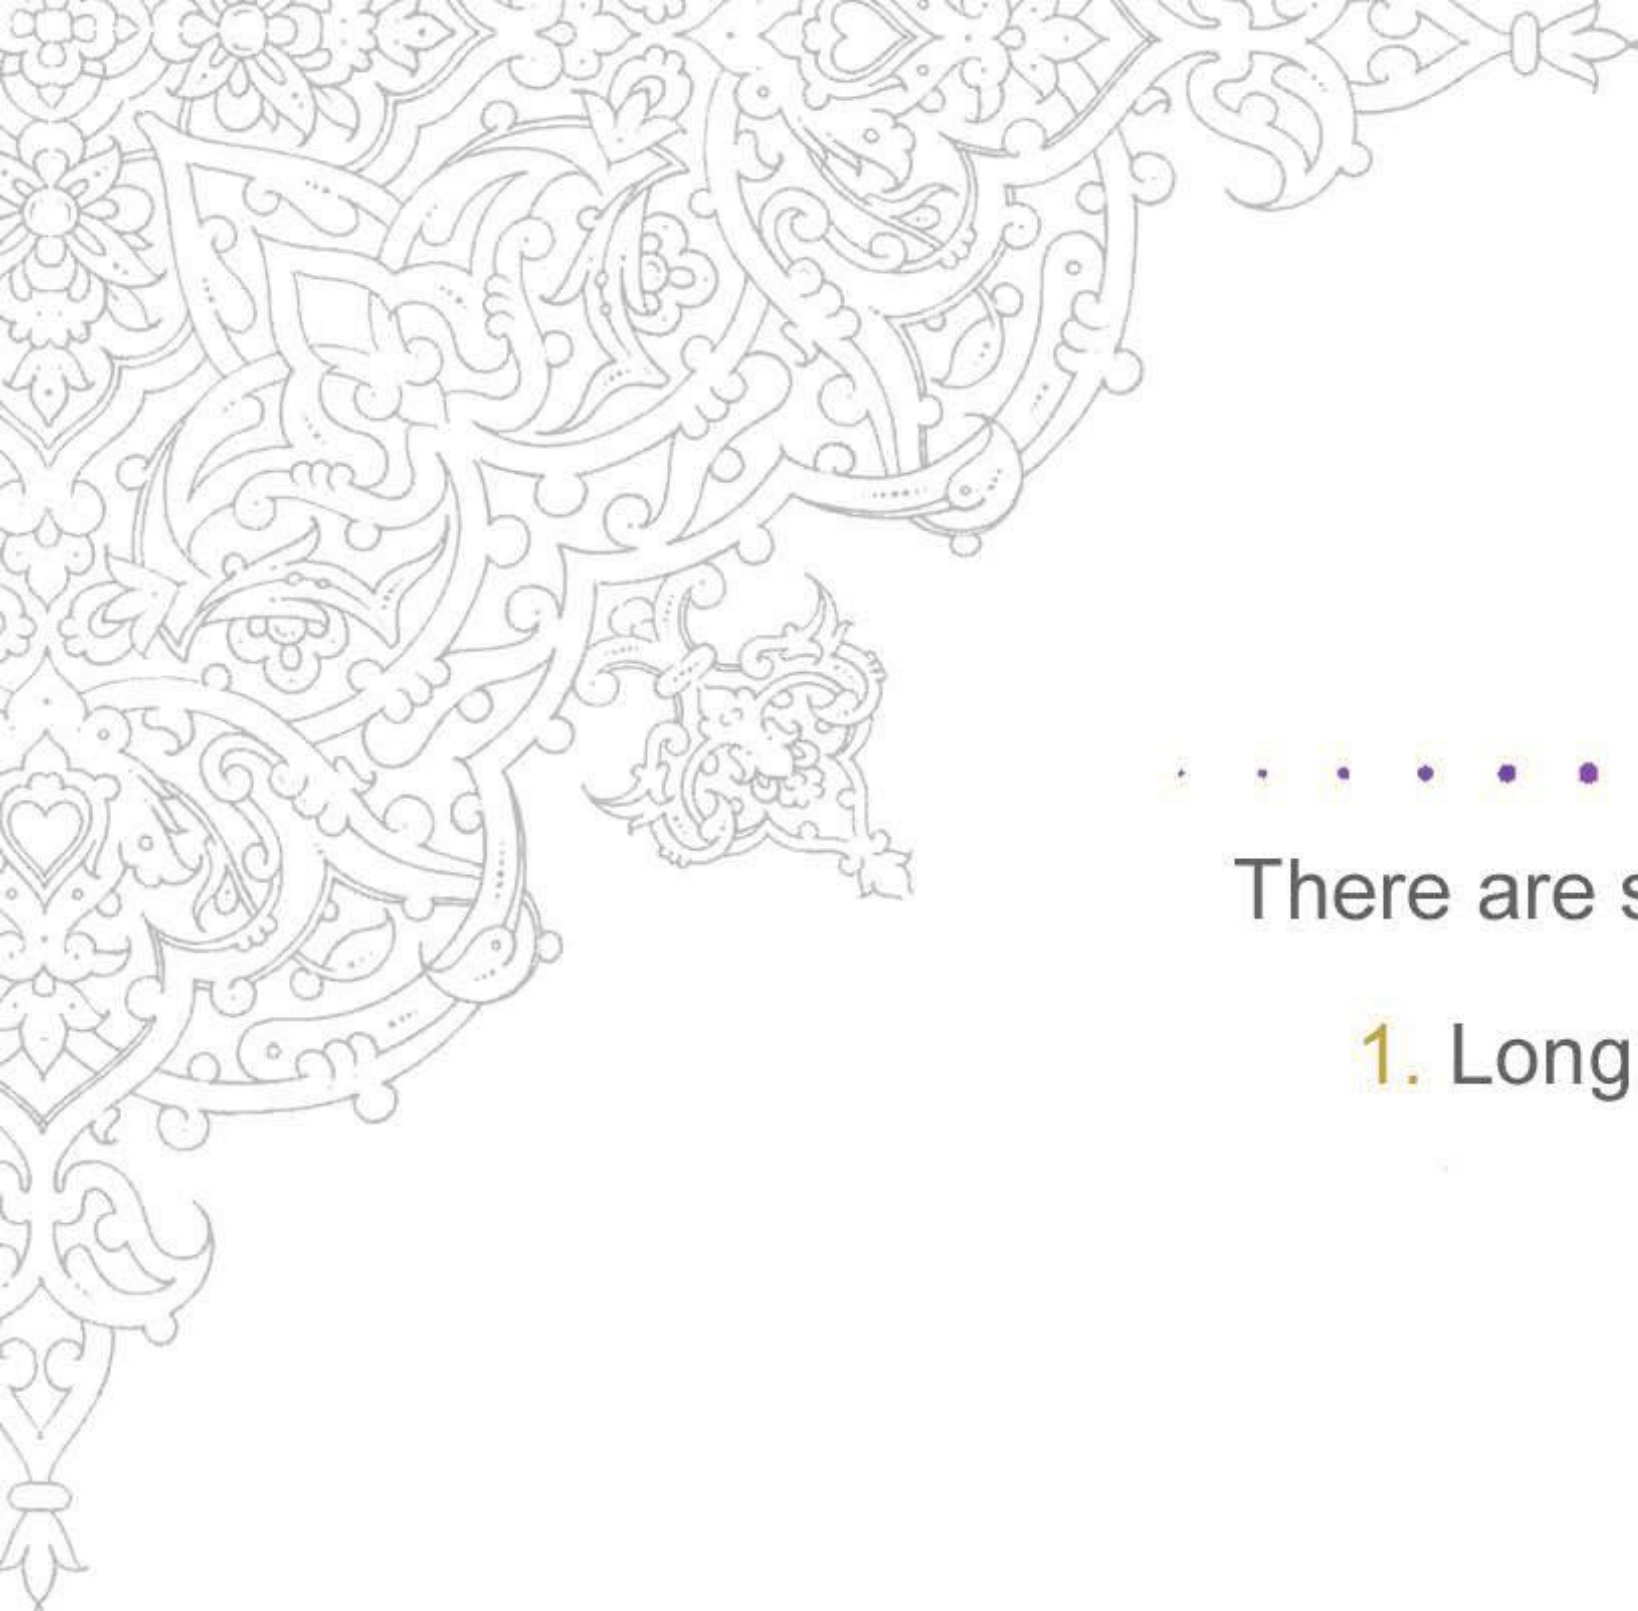

R&D system at Taher Agroindustrial Group is conducted with two main aspects as our priority:

1. Researches on commercial production & different markets analysis
2. Researches on the biology & control of insect pests which are related to food safety and quality of our products.
